## PROFILE

Hi, my name is Jacob, I've been working for almost 3 years as a backend developer. I created many features from scratch, including rest apis, database models, unit tests, scripts, you name it. I'm looking for a new job and opportunites.

## WORK EXPERIENCE

**Mateusz Jasiński Software**
*2021 July – 2024 February*
Full time Job. Creating web applications in a team of 4 people with technologies: Django, DRF, Docker, AWS, PostgreSQL, Flask, Elasticsearch. Day to day tasks included maintaing an already existing codebase with implementing new features, designing and creating new microservices, databse models, api endpoints and docker configs.
